

Tool Storage Fixture

To securely hold tooling while not in use, Applied Robotics offers a tool storage fixture plate designed for the XC1, BXC5, CXC10, BXC20 and CXC30 models.

BX20 shown

Features and Benefits

- Tool presence sensor verifies an empty fixture before replacing tool
- Tool presence sensor prevents uncoupling of your tool before it is nested in the fixture
- Minimal footprint design maximizing workspace ability
- Pre-drilled holes for easy mounting

Not exactly what your application requires? Applied Robotics can design a solution that meets your particular application needs.
